

CommVault & Clearwell Systems, Inc. Automate Discovery and Analysis of Electronically Stored Information (ESI)

“Nearly 90% of US companies with revenue of \$1B are facing 147 lawsuits at any given time.” (Gartner, November 2006)

KEY BENEFITS

- Enable enterprise-wide eDiscovery for all types of ESI including e-mail, collaboration, file system and Network Attached Storage (NAS) data
- Streamline eDiscovery process, from Records Management, Identification, Preservation, and Collection to Processing, Review, Analysis and Production
- Perform case assessments quickly and efficiently to determine best case strategy
- Simplify, speed and reduce the cost of enterprise-wide eDiscovery
- Mitigate risk and exposure for your organization
- Leverage cost-effective, reliable automation of discovery information
- Enable your organization to be best prepared for eDiscovery negotiations with opposing counsel

The Challenge

A combination of factors are pushing organizations to streamline eDiscovery in response to litigation, regulatory inquiries and corporate investigations. The rise in litigation and regulatory actions, coupled with decreasing tolerance for data management mistakes make responding to legal action costly and complex. Additionally, recent amendments to the Federal Rules of Civil Procedure (FRCP) have brought heightened attention to this topic. The rules make all Electronically Stored Information (ESI), not just e-mail, subject to legal review for all organizations.

The Solution

Together, CommVault® Archive and the Clearwell Intelligence Platform® deliver a powerful, comprehensive, and cost effective solution that allows enterprises to streamline and automate the eDiscovery process for responding to litigation, regulatory inquiries and corporate investigations. Clearwell enhances CommVault's already robust eDiscovery capabilities. The combined solution provides a comprehensive eDiscovery process to help mitigate risk and reduce exposure.

CommVault offers the only solution to manage all types of data across all repositories with one single interface. The CommVault® Singular Information Management® approach provides a flexible, audit-ready answer to archive concerns and includes a comprehensive strategy to enable end-to-end data management that spans archive, data protection and resource management. Following the Electronic Discovery Resource Model (EDRM), CommVault 7.0 provides customers with market-leading Records Management, Identification, Collection and Preservation capabilities. Once all the evidence has been preserved, CommVault passes data to the Clearwell Intelligence Platform® for Processing, Review, Analysis and Production. In conjunction with Clearwell Systems, CommVault users are easily able to perform advanced eDiscovery and deliver actionable intelligence from the information stored in their backup stores, live data, e-mail and document archiving solutions.

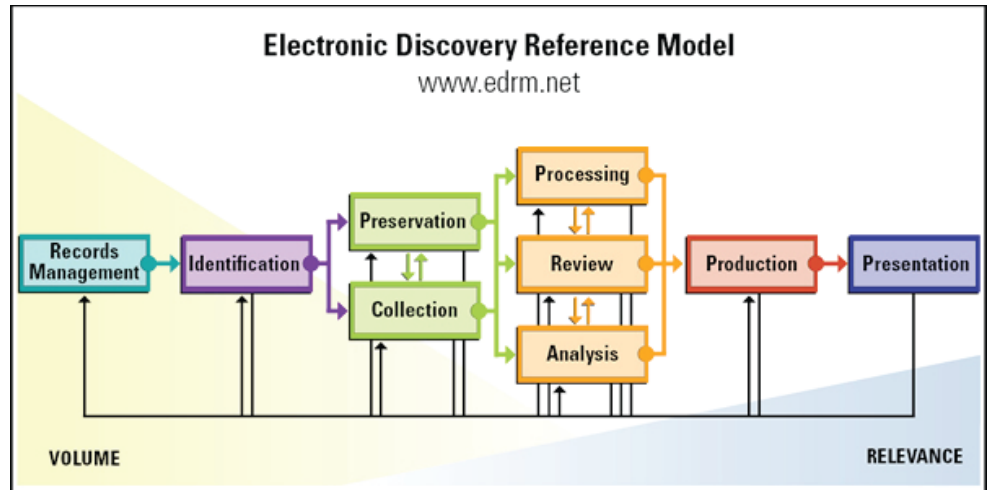

CommVault Features

- Capture and fully index all ESI using a legally defensible data management process
- Search across online, offline, archive and backup copies
- Execute legal holds across all data
- Lower risks by providing legal teams direct control of legal hold actions
- Export result sets to Clearwell

CommVault's Simpana® software suite of Backup and Recovery, Archive, Replication, Resource Management and Search software is designed to work together seamlessly from the ground up, sharing a single code and common function set. This exclusive single-platform architecture enables unparalleled software efficiency, performance and reliability for unprecedented control over data growth, costs and risk.

SIMPANA
software

CommVault and Clearwell offer a complete enterprise-wide eDiscovery solution as outlined in the Electronic Discovery Reference Model, which is the industry standard framework for electronic discovery solutions (www.edrm.net).

Conclusion

CommVault Simpana® 7.0 and Clearwell's Intelligence Platform 2.1 provide an unprecedented level of business intelligence from all types of ESI. With this intelligence, enterprises can rapidly find key evidence and assess their position quickly, therefore helping to choose the best strategy earlier in the litigation process.

For customers wanting to reduce the cost, duration and risk associated with eDiscovery, CommVault and Clearwell offer the most comprehensive solution in the marketplace that delivers immediate and significant return on investment.
