

# Commvault® Cloud Backup and Recovery for Google Workspace

Protect productivity data from cyberattacks, disasters, and operational mistakes

## OVERVIEW

Google Workspace, a suite of online communication and collaboration tools, has become a go-to platform for productivity, but with its cloud-based convenience comes the need for robust data protection. Commvault Cloud Backup & Recovery for Google Workspace delivers enterprise-scale protection and rapid recovery for Gmail, Google Drive, Shared Drives, Contacts, and Calendar.

## CHALLENGE

Google Workspace powers the day-to-day operations of modern organizations, but even in the cloud, data can be lost. Data loss or disruption, whether from accidental deletion, insider threats, or cyberattacks, can result in missing emails, files, or inaccessible calendars, directly impacting business continuity and productivity.

56%

of organizations experience SaaS data loss from malicious deletion

35%

of organizations require days or weeks to recover lost data<sup>1</sup>

While Google is responsible for the availability and performance of its platform, the responsibility for safeguarding the data living within it remains with the customer. Without dedicated protection and rapid recovery capabilities, organizations can face prolonged downtime, critical data exposure, and potential non-compliance.

## SOLUTION

Commvault Cloud Backup & Recovery for Google Workspace provides automated protection, fast granular recovery, and a unified experience for safeguarding your critical communication and collaboration data in Google Workspace.

With Commvault Cloud, you can:

- Comprehensively protect data across your Google Workspace environment
- Quickly locate and recover data with powerful search and flexible restore options
- Support long-term retention of data to help satisfy legal, regulatory, and internal standards
- Help accelerate legal, audit, and compliance requests with optional eDiscovery Compliance Search
- Protect Google Workspace and other on-premises or cloud application workloads with a unified platform

## ENTERPRISE-GRADE PROTECTION

Automate daily backups and achieve rapid recovery of critical email communications, documents, contact information, and more to minimize disruption to business productivity.

## MULTI-LAYERED RESILIENCE

With stringent protection standards, privacy protocols, and zero-trust access controls, Commvault Cloud provides multi-layer resilience to help minimize the effects of cyberattacks and combat today's data loss threats.

## EASY TO MANAGE

Protect Google Workspace alongside other on-premises or cloud application workloads, including Microsoft 365, Dynamics 365, endpoints, and VMs - all from a single platform.

Capability	Features and Benefits
