

# Active Directory Resiliency Report

YOUR RESULTS: **CRITICAL RISK**

## YOUR ACTIVE DIRECTORY IS AT CRITICAL RISK

Your score places you in the critical risk zone, indicating major gaps in security, backup, and recovery readiness. Organizations at this level often lack consistent protections across all three domains – infrastructure foundation, security posture, and recovery readiness – leaving them highly vulnerable to disruption.

## TYPICAL CHALLENGES IN THIS ZONE

- Limited or inconsistent AD backup and recovery validation.
- Privileged access controls that may not be centralized or enforced.
- Disaster recovery planning that is incomplete or untested.
- Gaps in AD and Entra ID protection across hybrid environments.

## RECOMMENDED PRIORITIES

Priority	Action
<b>Critical</b>	Deploy a Privileged Access Management solution.
<b>Critical</b>	Schedule frequent, immutable AD backups with verified recovery testing.
<b>Critical</b>	Broaden MFA coverage and session controls for all privileged operations.
<b>High</b>	Establish documented, repeatable recovery procedures for AD and dependent apps.
<b>High</b>	Strengthen privileged access management and expand MFA coverage.
<b>High</b>	Align AD and Entra ID under a unified resiliency strategy.

## HOW COMMVAULT HELPS

Commvault Cloud Backup and Recovery for Active Directory helps you:

**Automate and orchestrate forest recovery** to minimize downtime and reduce manual errors.

**Safeguard hybrid identity** with unified AD and Entra ID protection policies.

**Validate recovery readiness** through immutable backups and regular, audited testing.

## NEXT STEP

You're at a critical inflection point. **Consider an accelerated remediation plan and a guided resiliency workshop to prioritize controls, validate backups, and rehearse recovery.** Schedule a consultation with Commvault today.
