Commvault Cloud Cleanroom Recovery

Be prepared for when failure isn't an option

As cyber attacks become more pervasive and increasingly intelligent, your organization's data is in the crosshairs. To maintain continuous business when the inevitable breach occurs, it is critical to have a cyber recovery plan in place. Unlike traditional disaster recovery, cyber recovery assumes compromise across production systems, backups, and recovery environments—requiring full restoration even when those environments themselves may be at risk. Because of this scale and complexity, regular cyber recovery testing may remain out of reach for most enterprises.

Commvault Cloud Cleanroom Recovery™ built on Azure is a first of its kind offering designed to make testing cyber recovery more cost-efficient and accessible than ever.

42%
year-over-year increase in the number of observed ransomware victims since in 2025.[1]

$15.6T
predicted global cybercrime costs by 2029.[2]

With Commvault Cloud Cleanroom Recovery:

Complex cyber recovery testing made easy and affordable

Restore operations quickly after cyber events

Recover any workload to a verified clean Azure environment

Enterprise Strategy Group™
by TechTarget

"Commvault Cleanroom Recovery is the first and only solution to date Enterprise Strategy Group has validated that enables recovery to an assured-to-be-clean environment, made possible by Commvault's any-to-any portability.

Tony Palmer
Principal Analyst and Practice Director,
Enterprise Strategy Group

Benefits of Commvault Cloud Cleanroom Recovery on Microsoft Azure:

Test cyber recovery scenarios to help enable readiness

Enable non-disruptive forensic analysis after cyber incidents

Reduce downtime with on-demand failover environment

Simplified with automation and enterprise-grade AI

Orchestrated recovery of any workload directly to Azure

Demonstrate recoverability for cyber insurance purposes

Industry leading cyber recovery readiness with the power of Microsoft Azure

Cleanroom Recovery combines with Commvault Cloud Air Gap Protect™ to help strengthen data security and recoverability

Commvault Cloud Air Gap Protect

Help enable recoverability with simplified, air gapped storage

[Commvault Cloud Air Gap Protect](microsoft@commvault.com) ccombines the convenience and scale of on-demand cloud storage in Azure with enhanced data security, immutability, and predictable pricing. A simplified way to add that critical last line of defense and recoverability without requiring any additional cloud expertise or management.

Benefits of Air Gap Protect:

- Isolated, immutable, indelible backup copies
- Turnkey data resilience & recoverability
- Help address compliance requirements
- Simplified pricing with no egress charges

Better together: Commvault + Microsoft

Commvault and Microsoft have partnered for 29+ years to deliver trusted, enterprise-grade data environments with cyber resilience solutions. Our solutions, built on Azure, enable cloud resilience with NIST standards and zero-trust principles. Commvault and Microsoft help provide cyber resilience and rapid recovery for continuous business.

Have a MACC?

Commvault solutions can help you retire your Microsoft Azure Consumption Commitment (MACC) using funds pre-approved for cloud expenditures. Contact the Commvault team to learn more: microsoft@commvault.com
