

Commvault® Cloud Backup and Recovery for Microsoft Dynamics 365

Enterprise-grade protection for your CE data

Commvault Cloud delivers enterprise-grade data protection and recovery, with the simplicity of SaaS. With comprehensive coverage across production and sandbox environments, Commvault Cloud protects invaluable Dynamics 365 CE data, helping your business stay protected, compliant, and recoverable from today's data loss threats.

PROTECT PRODUCTION AND SANDBOX ENVIRONMENTS

- Automate and streamline backups
- Retain and restore data
- Rapidly recover from deletion, corruption, and ransomware attack

Automated Protection

Comprehensively protect your entities, records, forms, metadata, attributes, and more.

- Comprehensive coverage of records and metadata
- Automated, policy-based backups
- Built-in deduplication and compression for rapid recovery
- Zero hardware expenses with automatic updates

Granular Control

Stop data loss in its tracks. Pinpoint records, perform targeted restores, preserve critical data sets, and help simplify management of production and sandbox environments.

- Granular search with flexible restore options
- Point-in-time and version-level recovery
- Immediate restores, direct to production environments
- Sandbox seeding and retention
- Fully maintained metadata, properties, and permissions

Multi-Layered Cyber Resilience

With stringent protection standards, privacy protocols, and zero-trust access controls, Commvault Cloud provides multi-layer resilience to help minimize the effects of cyberattacks and combat today's data loss threats.

- Isolated, air-gapped backups from source data
- Layered security that meets industry standards and supports regulatory compliance
- At-rest and in-flight data encryption
- Role-based, SSO, SAML authentication controls
