

YOUR DATA FUTURE IS HERE. LET'S BUILD IT TOGETHER.

HPE and Commvault calm the noise and simplify the hybrid world. Together, we deliver powerful, integrated solutions that address the evolving data protection and availability challenges businesses face in today's AI era.

Key messaging

1.

Hybrid by design, not by accident

HPE and Commvault deliver a purpose-built, deeply integrated solution that simplifies hybrid complexity and empowers organizations to thrive in a dynamic, AI-enabled world.

2.

Unified cyber resilience everywhere your data lives

Unifying security, identity, and recovery for today's production and tomorrow's AI workloads, across clouds, regions, and on-premises environments.

3.

Scale innovation with confidence

Leverage the combined expertise and technology of HPE and Commvault to discover new value, accelerate business growth, and stay secure—no matter how your environment evolves.

Unified vision for cyber resilience built for the AI-centric world

The opportunity

The AI-centric world demands a new approach

The acceleration of AI is reshaping how organizations operate, compete, and innovate. However, this rapid pace brings new challenges—distributed data across hybrid environments, growing attack surfaces, and the urgent need for reliable, recoverable data to support modern workloads. Traditional data protection methods can no longer keep up. Organizations require an integrated solution that fits wherever they are in their data lifecycle.

The solution

Single solution for scalable performance, simplified operations, and provable recovery

HPE provides infrastructure that adapts to every stage of the data journey with superior flexibility, performance, and scalability. Commvault complements that capability with broad, adaptable data protection to secure information wherever it resides. More than a partnership, it's a tightly engineered integration that reduces complexity, strengthens security, and improves recovery from edge to cloud—reducing downtime and providing available, trustworthy, clean data.

- **True cyber resilience:** Unifying security, identity, and recovery for today’s production and tomorrow’s AI workloads, across clouds, regions, and on-prem environments.
 - Zero trust security with silicon root of trust providing a secure infrastructure hardened by design
 - AI-enhanced threat detection to identify risks faster and reduce dwell time
 - Air-gapped protection through Commvault Cloud Cleanroom Recovery, Commvault Cloud Air Gap Protect, HPE StoreOnce Systems or HPE Alletra Storage MP X10000 with data protection accelerator node, and HPE Cyber Resilience Vault—ensuring immutable backups safe from compromise
 - High-performance immutable snapshot management with Commvault IntelliSnap integrated with HPE Alletra Storage MP B10000 for rapid backup and recovery
 - Joint solutions with Commvault and HPE Zerto Software delivering ultra-low recovery point objective / recovery time objective (RPO/RTO) with continuous data protection (CDP) for your most critical workloads
 - Real-time backup analysis to identify and quarantine threats, with synthetic restores ensuring recovery from known clean points
 - Detect, visualize, and reverse threats in Active Directory and Entra ID
- **Scale without compromise:** High-performance infrastructure and flexible deployment models capable of performing at your business’s scale.
 - Unique multiprotocol and easy-to-manage enterprise storage platform with (HPE Alletra Storage MP B10000) unifying block, file, and object (HPE Alletra Storage MP X10000) workloads at scale on a single disaggregated architecture and delivering an AI-driven cloud experience across the hybrid cloud.
 - **Pay-as-you-go*** through GreenLake with Commvault—bringing cloud economics to on-prem data, simplifying billing, and eliminating overprovisioning

- **Unified data protection across hybrid** environments with Commvault HyperScale solutions—HyperScale Edge for distributed sites, HyperScale X for enterprise scale-out, and HyperScale Flex for S3 deployment flexibility
- **Simplified data management:** Cut through the complexity of managing data across on-prem, clouds, and edge:
 - **Single pane of glass management** unifying visibility, control, and consistency from production (HPE Alletra Storage MP B10000) to fast recovery (HPE Alletra Storage MP X10000) to virtual machine protection (HPE Morpheus VM Essentials Software)
 - **Seamless integrations** creating a cohesive solution that makes infrastructure work for you—easy to adopt, fast to deploy

Why this works

- **Bridging high-performance infrastructure with end-to-end data protection:** Customers get a simple, future-ready solution that meets, grows, and evolves with their business—no limits, just potential. The HPE and Commvault partnership bridges on prem and cloud to enable scalable operations, responsible AI adoption, regulatory compliance, and robust security. Beyond backup, it provides the tools, automation, and insights that turn distributed information into a strategic, trusted asset.
- **Push the boundaries of what’s possible:** HPE offers the flexibility to scale as needed, with infrastructure designed to meet the demands of hybrid environments.
- **AI-ready data protection.** Commvault Cloud leverages AI, machine learning (ML), and automation to simplify protection, detect threats faster, and recover with precision—strengthening resilience and achieving value from protected data.
- **We make it easy, so you can move fast:** Our seamless integrations give you the tools to make your infrastructure work for you—creating a cohesive, easy-to-adopt solution.

The bottom line

Built to excel in the AI era

As organizations scale, adopt AI with intent, and move workloads across on prem and cloud, success comes from visibility, control, and the agility to follow your data. HPE and Commvault provide a unified approach to data protection and availability—delivering the flexibility to grow, the security to innovate, and the resilience to keep you ahead in the AI era.
