

Commvault® Cloud: eDiscovery + Compliance

Help preserve data with less headaches and fewer oversights

Microsoft 365, Google Workspace, and Endpoint eDiscovery provides a single interface to help drive organizational compliance with better speed and precision.

Paired with Commvault Cloud data protection, businesses get the best of industry-leading cyber resilience combined with advanced tools to support regulatory compliance – all from one platform.

Say goodbye to disparate applications and expensive third-party solutions.

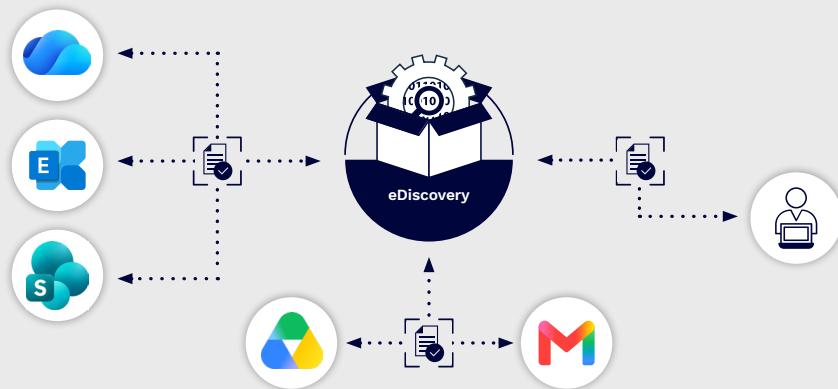

With eDiscovery for Commvault Cloud, you get inclusive coverage that fluidly spans across Microsoft 365, Google Workspace, and endpoint workloads.

- Rapidly identify pertinent emails and files – active or deleted
- Uncover data buried deep within workloads
- Locate records across Microsoft 365, Google Workspace, and endpoint environments, in unison
- Preserve data for legal and regulatory purpose with flexible pst exports
- Maintain EDRM compliance, adhering to identification, collection, and processing protocols

eDiscovery across:

Exchange Online	SharePoint Online	OneDrive	Gmail	Google Drive	Endpoints

A single experience to drive compliance across critical workloads.
