

Health Assessment Services for Commvault Cloud

DESIGNED FOR ACTIVE RESILIENCE – RECOVERY IS THE GOAL

HIGHLIGHTS

- **Identify improvement opportunities quickly** – Gain clear insight into operational, architectural, and configuration gaps across your Commvault Cloud environment.
- **Align data protection with business needs** – Validate that backup, recovery, archive, and reporting services support current and future business objectives.
- **Reduce risk and complexity** – Address inefficiencies introduced by growth, acquisitions, and evolving technologies before they impact operations.
- **Actionable remediation guidance** – Receive prioritized recommendations that help improve performance, resiliency, and overall value from Commvault Cloud.

OFFERING SUMMARY

Health Assessment Services for Commvault Cloud provide a structured evaluation of an organization's data protection environment to determine how effectively it supports business, operational, and resiliency requirements.

Commvault consultants work closely with IT and business stakeholders to review current backup, recovery, archive, disaster recovery, and reporting practices. Through interviews, technical analysis, and environment validation, the service establishes a clear picture of the current state and identifies opportunities for optimization.

The assessment delivers practical, business-aligned guidance that helps organizations improve service levels, mitigate risk, and plan for future initiatives—whether operating Commvault Cloud in a SaaS or on premises deployment model.

CUSTOMER OUTCOMES

- Increased confidence in the health and effectiveness of data protection operations
- Clear visibility into risks, inefficiencies, and improvement opportunities
- Prioritized remediation actions aligned to business impact and operational effort
- Improved resiliency and readiness for future growth or modernization initiatives
- Better return on investment from existing Commvault Cloud capabilities

KEY SERVICE COMPONENTS AND BENEFITS

Component	Description and Benefits
Standardized Assessment Approach	A proven, structured methodology leverages Commvault expertise to efficiently evaluate backup, recovery, archive, and reporting environments.
Data Protection Optimization Review	Validates that critical data protection functions are operating as intended and identifies areas for improved efficiency and reliability.
Stakeholder Collaboration	Incorporates input from technical and business stakeholders to check recommendations reflect real-world priorities and constraints.
Prioritized Remediation Planning	Develops a ranked set of strategic, tactical, and operational improvements to help teams focus resources where they deliver the greatest value.
Business-Aligned Recommendations	Aligns remediation actions with key business risks and resilience objectives to support measurable outcomes.
Remediation Roadmap Development	Provides a phased roadmap outlining remediation initiatives, timelines, and dependencies to support effective execution.
Advanced Feature Identification	Highlights opportunities to use underutilized Commvault Cloud capabilities to improve service levels, streamline operations, and optimize costs.

Health Assessment Services for Commvault Cloud are designed to help organizations validate their current environment, reduce risk, and establish a clear path for continuous improvement.

WHAT IS ACTIVE RESILIENCE?

Active Resilience is the ability to confidently answer two critical questions:

- Are you protected?
- Can you recover?

Commvault Services helps you answer **YES** to both - not just at go live, but consistently over time. This confidence is built by helping you achieve capability, not dependency.

Through structured knowledge transfer, clear and reusable document deliverables, and witness testing that supports recovery outcomes, your teams can gain the skills, evidence, and operational readiness required to recover. Protection enables resilience, but **recovery is the goal** - and Active Resilience enables you to be able to achieve it when it matters most.
