

# Protect your data in the hybrid cloud with Commvault

## Enterprise data protection is more challenging than ever

- Complexity**  
98% of global tech executives report their business to be impacted by increasing complexity of data across the cloud<sup>1</sup>
- Fragmentation**  
On average, organizations have 12 copies of data stored in a multi-generational sprawl<sup>2</sup>
- Cyber-resiliency**  
\$8T is the predicted global cost of cybercrime in 2023<sup>3</sup>

## Unlock the power of data with the right operating model

Leverage the next generation of data protection that delivers more than backup & recovery, & applies modern security technologies and practices: Commvault Complete data protection software delivered as a service with the HPE GreenLake edge-to-cloud platform.

### Commvault HyperScale™ X and Commvault Complete Data Protection software

Built-in automated security with edge-enabled ransomware detection and encryption

### HPE GreenLake Cloud Services

Scalable capacity delivered as a service with planning, provisioning, and consumption-based billing

### Commvault Command Center™

A single console to simplify data protection

### HPE Apollo and HPE ProLiant solutions

## Data protection designed to secure your workloads from edge to core to cloud

Together, Commvault and HPE GreenLake have your data covered and protected with a single platform that uses AI/ML for:

-  Real-time monitoring and anomaly detection
-  Fast recovery
-  Optimization of backups
-  Intelligent data indexing across your environment
