⬢ Commvault®

Design and Implementation Services for Threatwise

OVERVIEW

Commvault's Professional Services team offers comprehensive support for Commvault Cloud, ensuring seamless planning, deployment, and configuration of data protection agents for customers leveraging our cyber deception Threatwise SaaS-based capability. Our services allow you to focus on your core priorities while minimizing design and implementation risks and accelerating the time-to-value of your data protection management platform.

Design	Implementation
Commvault architects work closely with you to discover critical business requirements for your solutions and architect designs optimized to help meet those needs.	Commvault implementation specialists deploy the Commvault platform and data protection agents quickly and efficiently, allowing you to focus on your priorities.

With Commvault's Professional Services, you can trust our expertise and support to ensure a successful design and implementation of your Commvault Cloud solution, delivering reliable data protection and peace of mind.

Highlights of Design and Implementation Services

Design Component	Description	Benefit
Requirements Review	A dedicated Solution Architect will assess your critical workload types and review your networking configuration.	Enhance your cyber security resiliency with an additional layer of threat detection, diverting potential attackers and gaining confidence in proper deployment.
Design Planning	Design and plan the cyber deception solution, which covers critical success factors needed for the platform.	Identify potential vulnerabilities and attack vectors and develop a tailored strategy to deceive and deter cyber threats effectively.
Recommended Configuration	Develop and provide a detailed plan for infrastructure sensors and deception tokens.	Develop a tailored and robust cyber-resilient and cyber deception data strategy plan that effectively safeguards your data.

Commvault®

Implementation Component	Description	Benefit
Installation	Deploy sensors and deception tokens to protect your critical workloads.	Enhance your cyber security resiliency with an additional layer of threat detection, diverting potential attackers and gaining confidence in proper deployment.
Testing	Execute an acceptance test plan to demonstrate effective deployment.	Gain assurance and confidence to identify vulnerabilities and attack vectors in your environment to prevent a cyber incident.

Commvault will closely assess and deploy sensors and deception tokens to protect your critical workloads. Our team will work with you to identify critical business requirements in collaboration with our technical support if required.

We offer the following Threatwise service packages:

Service Name	Total Sensors Configured
Threatwise Starter	40
Threatwise Standard	100
Threatwise Advanced	500
Threatwise Enterprise	1,000
