MSP Portal

The MSP Portal simplifies all tenant management and activities providing flexibility, optimization, cost reduction, and quick time to value

- Rapidly on-board new tenants
- Invoice Management
- Operations Dashboard
- View and export detailed usage reports
- Available as REST API's for easy integration
- 2nd Tier Partner management
- Easy access to support from Commvault expert

Command Center Service Catalog

The Command Center Service Catalog provides operational management that can provided by an MSP Admin in white glove managed scenarios or as customer self-service

- Remote management and monitoring (RMM)
- Scheduled or on-demand backup & recovery
- Dashboard, reports, in-product support
- Optional white glove managed service scenarios
- Optional tenant self-service flexibility
- White label with service provider branding

Simple Operational Workflow Across the Tenant Lifecycle

Combine the power of the MSP Portal and Commvault Cloud's Command Center Service Catalog to deliver seamless and smooth cyber resilience.

- Managed Account
 - Automated onboarding
- Ongoing customer account management
- User Management
- Status tracking for support & service tickets
- Seamless service configuration
- Multi-Tenant administration
- Dashboard
- Security posture
- Alert notifications
- Usage reports
- Cost reports
- Billing and Invoicing
