

CUSTOMER STORY

WEITZ COMPANY

The Weitz Company improves access to data with Commvault Cloud Autonomous Recovery.

WEITZ

Construction firm reduces costs, complexity, and risk by protecting information in the cloud and at remote sites through a single data management solution.

Industry
Construction

Headquarters
Iowa, US

URL
www.weitz.com

In Numbers

- 6th oldest architecture/engineering/construction firm in the US

- 861 employees
- 10 locations

Key Assets Protected

- 180 VMware servers
- 200 million sub-4K files
- Salesforce.com
- Procore
- Remote construction sites

CHALLENGE

- Provide access to data to avoid costly project delays
- Protect data in remote construction sites
- Reduce complexity of data backup and recovery across a hybrid environment

SOLUTION

- Commvault® Cloud provides centralized protection for remote sites, on-premises data and cloud-based applications
- Commvault data classification makes it possible to keep a secondary copy of 200 million sub-4K
- Commvault’s powerful de-duplication ensures reliable backups from remote construction sites with bandwidth limitations

RESULTS

- Remote deployment to job sites
- Ability to perform restores in minutes to and from any location, including remote construction sites
- Provide access to historical emails
- Boosts data agility and responsiveness

“Commvault gives us the power to protect our data from various sources and formats from a single interface, drastically reducing the costs and efforts required for backups. Moreover, its proven recovery capabilities have saved us multiple times from ransomware attacks which could have been devastating.”

Ryan Sinnwell, Senior IT Manager, Infrastructure
The Weitz Company
