

Commvault® Cloud Backup and Recovery for Google Workspace

Commvault Cloud delivers powerful, enterprise-grade data protection for Google Workspace. With comprehensive coverage across Gmail and Google Drive, Commvault keeps valuable data safe from deletion, corruption, and ransomware attacks—all with the simplicity of SaaS.

DATA RESILIENCY AND RECOVERY

- Advanced data protection and resiliency
- Isolated and immutable backups in an air-gapped location
- Dedicated controls to meet retention and recovery SLAs

Hassle-free protection

Comprehensive protection for Gmail, Google Drive, and Shared Drive data. Effortlessly locate active or deleted data, rapidly recover from an attack, and help meet your SLAs with ease.

Enterprise-grade protection

Go above and beyond for your critical Google Workspace data. With stringent protection standards, privacy protocols, and zero-trust access controls, Commvault Cloud provides multi-layer data protection to minimize the effects of cyber attacks and combat today's data loss threats.

Award-winning SaaS

With Backup & Recovery for Google Workspace, you get cost-effective data protection, without the complexity. Harness the power of hassle-free deployments, maintenance, and management. SaaS that's proven to reduce costs and eliminate headaches—so you only pay for what you need.

- Gmail and Google Drive data and metadata protection
- Auto-discovery for proactive protection of new users and data
- Recovery of entire mailboxes and individual emails to multiple locations
- Recovery of entire drives or individual files to multiple locations
- Long-term, extended retention

- Air-gapped backups isolated from source data
- Layered security that meets industry standards and supports regulation compliance
- At-rest and in-flight data encryption
- Role-based, SSO authentication controls

- Extended retention and Google Cloud Storage included
- Student user licenses are free. Only the capacity used counts towards capacity entitlement.
- No hardware or large upfront capital investments
- Zero egress fees or hidden storage charges
- Automatic updates and maintenance
