

# Future-Ready Cyber Resilience

## SOLUTION BRIEF

In today's data-driven world, every minute of downtime costs money and potentially damages your brand and reputation. A single ransomware attack averages \$14K per minute<sup>1</sup> – making cyber resilience crucial to business continuity.

Commvault and Dell Technologies work together to help businesses restore operations faster and improve data security, resilience, and performance.

Our co-engineered solutions deliver a comprehensive, integrated approach to data security, readiness, and recovery that combines Dell's powerful storage systems with Commvault's industry-leading platform for data security, early threat detection, and orchestrated recovery. IT and security teams benefit from a unified interface that simplifies data management across complex, hybrid environments – reducing risk, consolidating tools, and boosting performance.

## BUILD RESILIENCE IN AN EVOLVING DIGITAL LANDSCAPE
