Commvault® Cloud with Premium Microsoft 365 Backup Storage

High-speed backup and bulk restores at scale for Microsoft 365

Microsoft 365 often houses petabytes of valuable data that is essential to business continuity. In the face of increasingly frequent cyberattacks, the ability to protect and rapidly restore this data at enterprise scale is critical.

Built on Microsoft 365 Backup Storage APIs, Commvault Cloud with Premium Microsoft 365 Backup Storage delivers ultra-high-performance backup and restore, optimized for disaster recovery scenarios where speed is critical, so that users can be back up and running with all their data in hours, even after a complete data loss.

KEY CAPABILITIES

- **High-speed backup:** Backup SharePoint sites, OneDrive accounts, and Exchange mailboxes within the Microsoft trust boundary.

- **Bulk restores at scale:** Restore data at speeds of up to 2TB per hour[1] to help minimize the imapct of business disruption.

- **Centralized management:** Safeguard Microsoft 365 and other on-premises and cloud workloads and applications with a single platform.

> Bulk restore recovery speeds of up to
> # 2TB
> per hour at scale[1]

EXTEND YOUR MICROSOFT 365 PROTECTION CAPABILITIES

Commvault Cloud with Premium Microsoft 365 Backup Storage can be used as a standalone solution or paired with Commvault® Cloud Backup & Recovery for Microsoft 365, our full-feature backup and recovery solution, for enhanced functionality, including:

Teams backup and restore
Broad Teams support, including channels, tabs, posts, files, and more.

Air-gapped, immutable backups
Help prevent data tampering and enable rapid restoration from secure storage in the event of an attack.

Backup & retention flexibility
Customizable backup and retention schedules, and flexibility to exclude specific content from backups.

Flexible, granular recovery
Restore at the file level, cross-user, cross-tenant, or to an alternate location.

Self-service restore
Empower end-users to restore data, helping reduce the workload on IT teams.

Advanced search & eDiscovery
Pinpoint, preserve, and export data with speed and precision.
