

# Commvault's SaaS line, Metallic® Backup for Office 365

Your documents, inboxes, and conversations need protection too

NetApp and Commvault are proud to offer Metallic® Office 365 Backup, a modernized data management and protection solution. Commvault's SaaS line, Metallic® delivers powerful, enterprise-grade data protection – without the complexity. With broad-ranging coverage across the entire Microsoft 365 environment, Metallic keeps valuable data safe from deletion, corruption, and ransomware attack – all with the simplicity of SaaS.

## Rising cloud adoption demands a modern approach to data management

With the rise of cloud adoption, businesses are leaning into SaaS applications, realizing new ways to increase productivity, reduce operating costs, and more. SaaS provides great agility and new efficiencies. At the same time, it doesn't replace the need for businesses to safeguard their own critical data. And while organizations don't need to worry about hardware failure, natural disasters, and other conventional challenges, they still must ensure data is protected, compliant, and recoverable from new threat vectors.

### The top causes for SaaS app data loss include:

<p>21% of data corruption arises from complications related to integrations and service unavailability.</p>	<p>19% from ransomware and external attacks.</p>	<p>6% from malicious attacks by internal bad actors.</p>	<p>20% by accidental deletion, user, and admin errors.</p>
---	--	--	--

\* Other data loss stems from misunderstood retention policies, gaps in current backup solutions, account closure, and more. Source: ESG. The Evolution of Data Protection Cloud Strategies, 2021

Despite offering highly robust platforms, our industry's top cloud service providers follow the shared responsibility model. Under this model, the cloud service provider is responsible for their SaaS applications' underlying infrastructure and service, while the customer assumes responsibility for protecting their data.

And yet, it is not a well-known fact, as only 13% of the businesses actually understand their role in safeguarding their data. Therefore, it is imperative to have enterprise mission-critical data stored and protected by a specific data backup, management, and protection solution. All the docs, inboxes, and conversations need this comprehensive protection.

Problems that we solve
Data protection for Microsoft365
No vendor lock-in of your data
Data retention for compliance and regulatory purposes

**The NetApp and Commvault advantage for modern data management**

Two industry leaders, one integrated approach to backup, recovery, and data management. The power of NetApp AND Commvault removes point solution complexity while accelerating digital transformation. One single integrated solution from core to edge to multi-cloud. And for your business to get the most from your data, NetApp helps you optimize the performance of your data fabric while Commvault transforms and modernizes your data protection strategy.

Features
<p><b>Complete Coverage</b></p> <p>Comprehensive protection across Exchange, Teams, OneDrive, and SharePoint data. Effortlessly locate active or deleted data, rapidly recover from attack, and meet your SLA and compliance requirements with ease.</p>
<p><b>Enterprise-grade Protection</b></p> <p>Go above and beyond for your critical Microsoft 365 data. With stringent security standards, privacy protocols, and zero trust access controls built-in, Metallic provides multi-layer data protection to combat today's data loss threats.</p>
<p><b>Award winning SaaS</b></p> <p>With Metallic® Office 365 Backup, you get cost-effective data protection – without the complexity. Metallic means hassle-free deployments, maintenance, and management. SaaS that's proven to reduce costs and eliminate headaches – so you only pay for what you need.</p>

**Data protection and recovery you can trust**

The NetApp and Commvault partnership provides a modernized cloud data management and protection solution that is super-fast, scalable, and cost-effective. It is streamlined with a single, simple platform spanning the broadest set of workloads in the industry. This solution offers additional benefits related to reduced costs, reduced risk exposure to ransomware attacks, and more efficient compliance with data governance and privacy regulations – thereby fostering innovation.

Commvault's SaaS line, Metallic, provides the tools you need to manage, migrate, access, and recover your data no matter where it lives, while reducing cost and risk. Microsoft trusts Metallic solutions to manage and protect some of its most important data and workloads. Commvault is proven and ready to help you harness the power of your data. Partnering with Microsoft Azure, the Metallic SaaS Backup solution delivers data protection and recovery you can trust

Metallic Office 365 Backup is a secure, encrypted cloud-native service that protects Microsoft 365 data, delivering powerful, enterprise-grade data protection. With broad-ranging coverage across the entire Microsoft 365 environment, this solution keeps valuable data safe from deletion, corruption, and ransomware attack – all with the simplicity of SaaS. We allow the enterprise to back up data to the cloud data center of your choice. You can have the SaaS Backup service store your backup data in NetApp's Amazon Web Services (AWS) or Microsoft Azure multitenant cloud repository.

This comprehensive backup solution is hosted in the cloud, eliminating the need to install, upgrade, and maintain software. It covers Exchange Online, SharePoint Online, OneDrive for Business, Microsoft 365 Groups, and Microsoft Teams. It backs up all your data in the service environments. You get the complete SaaS Backup feature set across all Microsoft 365 services, giving you greater flexibility.

**Key benefits**

- Long term, extended retention, beyond recycle bin limitations
  - Granular search & eDiscovery
  - Flexible point-in-time and out-of-place recovery options
  - Deduplication and compression for optimized performance
- 
- Isolated, air-gapped backups from source data
  - Layered security plus GDPR compliance
  - At-rest and in-flight data encryption
  - Role-based, SSO, SAML authentication controls
  - SOC2 and ISO 27001 certified
- 
- Unlimited Azure storage and unlimited retention included
  - No hardware, installation, or large upfront capital investments
  - Zero egress fees or hidden storage charges
  - Automatic updates and maintenance built-in

**How Metallic safeguards your Microsoft 365 investment**

As a cloud-native SaaS solution, built leveraging the best of Azure PaaS and native services, the Metallic control plane is in the cloud. As our enterprise customer, you can log in online and access the hub to manage your backup solution.

The platform includes offerings such as endpoint protection and Microsoft 365 data, plus the cloud and on-premises workloads from data pass to VMs and containers running on prem and in the cloud – to unstructured data like large file systems. In the case of a hybrid cloud environment, you have the flexibility to purchase Commvault’s SaaS line, Metallic cloud storage, as a backup target – or you can leverage your own storage – on premises or in the cloud.

Take a look at this representation:

Supported Platforms and Applications

- Microsoft365 Exchange Online
- Microsoft365 Teams
- Microsoft365 SharePoint
- Microsoft365 OneDrive
- Microsoft365 Groups
- Microsoft365 Project Online

Storage:

- Unlimited Azure storage included with unlimited retention

Editions Available:

- Metallic Microsoft365 Backup Essentials Edition
- Metallic Microsoft365 Backup eDiscovery Edition

Commvault’s SaaS line, Metallic backup, is an easy-to-use, cloud-native SaaS offering. You simply sign in, choose the Microsoft 365 service (Exchange Online, SharePoint Online, OneDrive for Business, Microsoft 365 Groups, and Teams) that you want to protect, and select your backup target. It is that easy to start protecting your data. There is no software or hardware to buy and nothing to install. Instead, you get a complete backup service from NetApp and Commvault for your Microsoft data.

## About Commvault

Commvault is a global leader in data management. Our Intelligent Data Services help your organization do amazing things with your data by transforming how you protect, store, and use it. We offer a simple and unified Data Management Platform that spans all your data – regardless of where it lives (on-premises, hybrid, or multi-cloud) or how it’s structured (legacy applications, databases, VMs, or containers). Commvault solutions are available through any combination of software subscriptions, integrated appliances, partner-managed, or Software-as-a-Service via our Metallic portfolio.

Visit [www.commvault.com](http://www.commvault.com).

## About NetApp

NetApp is the leader in cloud data services, empowering global organizations to change their world with data. Together with our partners, we are the only ones who can help you build your unique data fabric. Simplify hybrid multicloud and securely deliver the right data, services, and applications to the right people at the right time. Learn more at [www.netapp.com](http://www.netapp.com).
