DATA SHEET

Commvault® Cloud Compliance

Reduce time and costs for eDiscovery, facilitate efficient compliance, and ensure relevant legal data remains unaltered

OVERVIEW

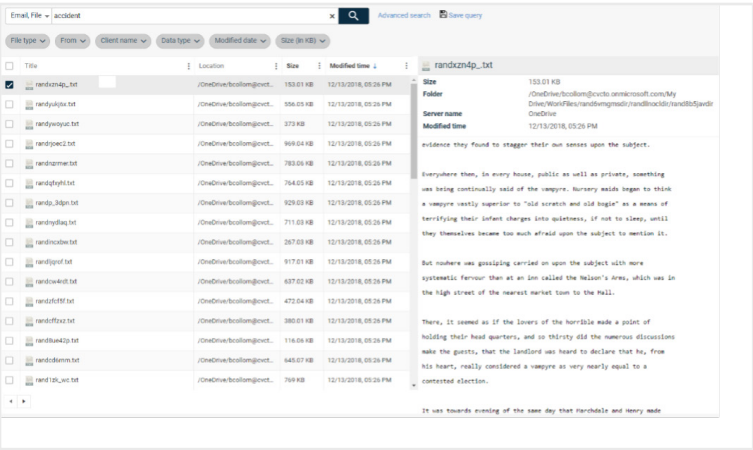

Changing regulations impact data handling and privacy processes, creating compliance challenges with regulatory and organizational policies. Increasing demands for specific information related to subject data requests and legal situations means you must find the correct data – fast.

With your data residing in more places than ever before, how do you answer these compliance questions:

- Can you quickly search for compliance data across all locations, including email and endpoint devices?
- Can you proactively preserve key data sets for review?
- Can you provide trust in the data, ensuring key data is not modified or deleted?
- Can you support post-incident investigations of data breaches caused by cyberthreats such as ransomware or leakware?
- How long does it take to respond to legal or compliance-related data requests?
- How can you reduce expensive costs for external legal services?

43% of Chief Compliance Officers say that new regulatory requirements pose the greatest challenge to their compliance efforts over the next two years.[1]

MEET YOUR LEGAL AND COMPLIANCE NEEDS

Commvault Cloud Compliance gives you the information needed to answer these questions through valuable data insights, allowing you to reduce eDiscovery time and costs, facilitate efficient compliance, and ensure relevant legal data remains unaltered. This is achieved with a highly efficient means to quickly collect electronically stored information (ESI) – including emails and documents for investigations from immutable backups, assuring a trusted chain of custody while providing easy management through a single user interface – the Command Center.

1. 2023 KPMG Chief Ethics & Compliance Officer Survey

Commvault Cloud Compliance reduces time and costs for eDiscovery, enabling you to:

Perform powerful and fast searches with advanced search techniques

Immediately review collected electronically stored information

Streamline the review process

Prove chain of custody to ensure relevant data is unaltered

Collect data from immutable sources with legal hold

KEY FEATURES

Feature	Details
Collect data from immutable sources (backups) with legal hold	• Proactively preserve ESI from immutable backups to ensure that original data cannot be lost or modified • Create legal holds to ensure the case folders and their contents survive default data retention policies • Automatically capture data for custodians or file locations based on rules, search criteria, and content filters • Streamline operational efficiency for data collection through supporting one-time, scheduled, or continuous operations
Immediately review collected electronically stored information	• No downtime needed to build new indexes, as indexes are pre-built from backups • Expedite review time for eDiscovery and compliance tasks • Lower costs for eDiscovery as review stage is shortened
Prove chain of custody to ensure relevant data is unaltered	• Ensure data is not modified or deleted for legal and compliance purposes • Use built-in reporting, auditing, and logging features to provide trust in the data
Perform powerful and fast searches with advanced search techniques	• Streamline searches leveraging advanced techniques such as Boolean operators, query builder, fuzzy logic, proximity search, and search within a search • Content and filtering of email/file metadata • Expedite search results as indexes are pre-built from backups
Streamline the review process	• Reduce time and costs spent between IT and external legal departments • Provide focused features such as bulk/granular tagging, hit highlighting, review sets, filters, and search within a search • Simplify data export using multi-format for use with external systems and teams

COMPLETE YOUR CYBER RESILIENCE STRATEGY

Enhance your cyber resilience by combining Commvault Cloud Compliance with the Commvault Cloud Autonomous Recovery package. Designed for automated disaster recovery and cyber recovery use cases, Autonomous Recovery provides AI-driven automation, continuous replication, and automated failover to ensure your data is clean, complete, and always available.

Commvault Cloud Compliance can operate independently of Autonomous Recovery or as part of a combined solution to enhance your business's cyber resilience.

Use Commvault Cloud Compliance today to reduce time and costs for eDiscovery, facilitate efficient compliance, and ensure relevant legal data remains unaltered.
